NAI M nth [REDACTED]	1	<p>[REDACTED] TS-Would like to go forward with this one. NN-20 is not currently funding this technology.</p> <p>VL-NN-20 is the sponsor. We need to find out how they feel about us licensing this technology.</p> <p>FM-It's patentable. A publication went out [REDACTED] to DOD for a conference. Think it's a wonderful disclosure-solid and well thought out. We need to take some action soon because of a possible bar date.</p> <p>BW-We ought to write it.</p> <p>[REDACTED] AD-There are three companies interested in this. Think the sponsor wants to commercialize. No publications. Real close to reduction to practice.</p> <p>[REDACTED] kb-Rights requested [REDACTED], though never granted. Linda Lerner will send 2nd request to DOE.</p> <p>[REDACTED] BW-Checked with Daubenspeck and haven't heard back.</p> <p>VL-Evidently, DOE never did grant them. Mixup with paperwork. Resent paperwork and they will respond back. By the time we get ready to do Top 20, we should hear from DOE. Linda can give us an update.</p> <p>AD-Full prototype is to be complete within one year.</p>	<p>[REDACTED] TL-Check on sponsor's attitude towards licensing this technology and get back to Veronica.</p> <p>[REDACTED] VL-Waive and file</p> <p>[REDACTED] BW-Check with Daubenspeck if rights haven't been granted.</p> <p>[REDACTED] : Waive & File</p> <p>[REDACTED] Waive and File</p>
